

Dear FCC, K-Love radio station has been a positive influence in my life and our community. It is a station that can be played with all ages in the car from children to elderly and they all enjoy it. I don't have to worry about comments in front of small children's ears. The music is uplifting and encouraging and spreads a positive outlook to those who listen to it. People have often asked me about the station I listen to and have started listening themselves. K-love builds family and community in positive ways. Please do not enact any law or rule that will take away local broadcast of this station.
